

Technical Specifications

Sensor:	10.5, 32, 40 or 50 Mio. pixel sensor available
Exposure time:	0,3 seconds
Cycle time:	1.9 seconds
Light source:	LED illumination system (cold light), less power energy requirement (< 100 W) UV- and IR-free, no radiation exposure for the operator according. EN60825-1
Optic:	Rodenstock Rodagon, depth of focus 5 inch (12,5 cm) cm for maximum sharpness
Color depth:	36bit color internally, output 24bit color
Image formats:	Color
Layout table:	18" x 24" layout section (> A2!) for books with a spine up to 12 cm
Camera interface:	USB 2.0 standard
Output formats:	TIFF, PDF, JPEG, JPEG2000
Power supply:	100 V - 240 V, 47 Hz - 63 Hz, 200 VA
Internal power supply:	12 V and 24 V
Software:	Book Expert Public with integrated image enhancement software
User Interface:	Touchscreen with multilingual User Interface
Copyright protection:	Copyright protection by automatic request and water mark (optional)
Embedded PC:	Operating system Windows XP embedded with Microsoft Enhanced Write Filter Technology for maximum security against computer viruses. Integrated embedded PC specialized for industrial applications with extended lifetime and long-term availability of parts and support based on ATI/AMD mobile chipset and CPU designed for 24/7 operation, touchscreen 15", pre-installed software with intuitive user guidance.
Accounting Interface:	Interface for connection with accounting systems
Remote maintenance:	Maintenance via remote service
Delivery:	Pre-assembled and ready-to-use delivery (plug & play)
Maintenance:	Maintenance free
Dimensions:	height: 1290 mm, width: 665 mm, depth: 840 mm
Weight:	50 kg (110,23 lb)

book2net kiosk

book2net kiosk: the future of self-service book scanning

The new book2net kiosk is designed to enable a fast and economic capturing of documents in public areas as

- Reading rooms in public and academic libraries
- Companies
- Banking houses
- Lawyer's offices

Due to the unique product concept the book2net kiosk is more than a replacement technology for current copiers: **book2net kiosk enables you to fit your requirements in a much better way, improve your service and reduce your costs significantly.**

The configurable graphic user interface gives you the opportunity to adapt the software on your individual workflow. Single functions can be easily added and up to 7 languages are available for user guidance.

To meet legal requirements book2net kiosk enables you to implement copyright regulations and/or watermark as an integrated part of the workflow.

Additionally it is possible to integrate a customer or sponsors logo on the graphic user interface.

The new twin touch technology and remarkable short cycle time enables the unskilled walk-up operator to achieve high-quality scans quick and easy.

feel confident!

The book2net kiosk is delivered as an out-of-the-box solution. Just plug in the power supply and start!

book2net kiosk is designed for 3 million cycles and has less mechanical components. For a maximum reliability all components are highly protected and the robust construction is well adapted for the use in public areas.

The twin-USB port offers you double security and long-term reliability for a trouble-free operation.

Due to the Windows XP embedded operating system with Microsoft Enhanced Write Filter Technology the book2net kiosk offers maximum security against computer viruses and long-term support by Microsoft.

The PC is equipped with industrial standard components with extended lifetime and long-term availability.

hush!

book2net kiosk is comfortable quiet because it generates no noise caused by mechanics or a fan.

ease of use!

The unique twin touch technology of the book2net kiosk enables even unskilled walk-up operators to achieve a high-quality scan with only two touches.

The intuitive touch screen user interface offers the possibility to switch between 7 languages at any stage of operation.

earn more revenue!

Beyond the added value the new technology of the book2net kiosk offers to you it also gives you the opportunity to reduce your costs and raise your revenue.

- Improved service to the public by providing digital colour images instead of bi-tonal paper copies
- Significantly expanded range of documents which can be supplied to the public through self-service as A4/ A3 limitations do not apply
- Lowest total cost of ownership
- book2net kiosk is maintenance-free.
- The accounting interface of the book2net kiosk enables an easy integration in any payment system
- Workflow is streamlined and turning more cost-efficient

quality & productivity!

Depending on your individual requirements book2net kiosk can be equipped with a 10.5, 32, 40, or 50 MP sensor.

Due to its outstanding scan speed of 0.3 seconds and the short cycle time of only 1.9 seconds book2net kiosk offers you an unrivaled productivity
